

Corgi Installation Instructions

To get started, just open up “index.html” to see the exact html theme structure. Your css and js includes need to have the following order in the head of your document:

```
<link href="css/bootstrap.css" rel="stylesheet">
<link href='https://fonts.googleapis.com/css?family=Raleway:400,600' rel='stylesheet'
type='text/css'>
<link href='css/corgi.css' rel='stylesheet' type='text/css'>
<link rel="stylesheet" href="css/elusive-webfont.css">
<script src="js/jquery.min.js" type="text/javascript"></script>
<script src="js/corgi.js" type="text/javascript"></script>
<!-- elusive icons ie7 support -->
<!--[if lte IE 7]><script src="js/lte-ie7.js"></script><![endif]-->

<!-- HTML5 shim, for IE6-8 support of HTML5 elements -->
<!--[if lt IE 9]>
<script src="js/html5shiv.js"></script>
<![endif]-->
<style>
body {
padding-top: 80px; /* Only include this for the fixed top bar */
}
</style>
```

The rest of the theme structure can be seen in the index.html file included in your download. If you need help, email me at bootstrapmicro@gmail.com

Thanks for your purchase!

Cheers,

Damian
